Zohaib Ahmad Khan Sumbal

Data Scientist & Machine Learning Engineer

Muzaffargarh, Pakistan • +92 306 1032323 • zohaibsumbal8@gmail.com

PROFILE

A highly motivated Data Science graduate passionate about programming, machine learning, deep learning, and AI. Seeking a challenging role in a well-reputed firm to apply data science and machine learning skills to real-world problems.

EDUCATION

BS in Data Science — MNS University of Agriculture Multan (MNSUAM) 2022 – 2026 • CGPA 3.10/4.0

HSSC (Pre-Engineering) — Sardar Kaurey Khan Public Higher Secondary School 2020 – 2022 • 70%

SSC (Matriculation) — Sardar Kaurey Khan Public Higher Secondary School 2018 – 2020 • 72%

SKILLS

Programming: Python, C++, Java, R

Data Science & ML: Data Analysis, Data Visualization, Machine Learning, Deep Learning, ANN, Computer Vision, CNN, NLP, Agentic AI

Databases: SQL

Tools: GitHub, Jupyter Notebook, Power BI, Tableau

AI Tools: ChatGPT, Claude, Cursor, Kiro, Codex

OS & Office: Linux, Windows, MS Word, Excel, PowerPoint

FEATURED PROJECTS

- **AI Virtual Try-On System** — Computer vision & deep learning garment fitting on human images.
- **Car Violation Detection** — Number plate & headlight violation detection using object detection.
- **IoT Pet Monitoring System** — Real-time tracking and environmental monitoring with ESP-family MCUs.
- **IoT Bird Repellent System** — Bird activity detection with automated deterrents.
- **Fraud Detection System** — ML models identifying suspicious transaction patterns.
- **BI Dashboards** — Interactive Power BI & Tableau dashboards for decision support.
- **Spam Voice Detection** — Audio signal processing & ML classification.
- **Medicine Demand Prediction** — Time-series forecasting for retail pharmacy sales.

RESEARCH / PUBLICATION

An Intelligent IoT-Based Non-Invasive Glucose Monitoring System Using Machine Learning

Designed a multi-parameter biometric health kiosk using ESP32-S3, MAX30102, and MLX90614 sensors; developed a five-state FSM firmware with FreeRTOS dual-core scheduling and a context-aware glucose estimation algorithm.

- Clarke Zone A+B accuracy: **87%** • HR MAE **3.2 BPM** (r = 0.961) • SpO■ MAE **1.4%** • Prototype cost **USD 38**
